

Composition of the atmosphere

	Nitrogen:	78,08%		CO2 Total:	0,04%
	Oxygen:	20,94%		CO2 Natural:	0,0384%
	Argon:	0,93%		CO2 Human:	0,0016%

The green square at the top right is the total CO2 contained in the Earth's atmosphere which is 0.04% of the total. 0.0384% is natural CO2, and 0.0016% is that produced by human activities (white square). All of Europe contributes 16% of that little white

All of Europe contributes 10% of that little white quadrant, or 0.000256% of the total.
